

Cub Manufacturing News 11/5/15

By Mr. Ryan Lamb and Students

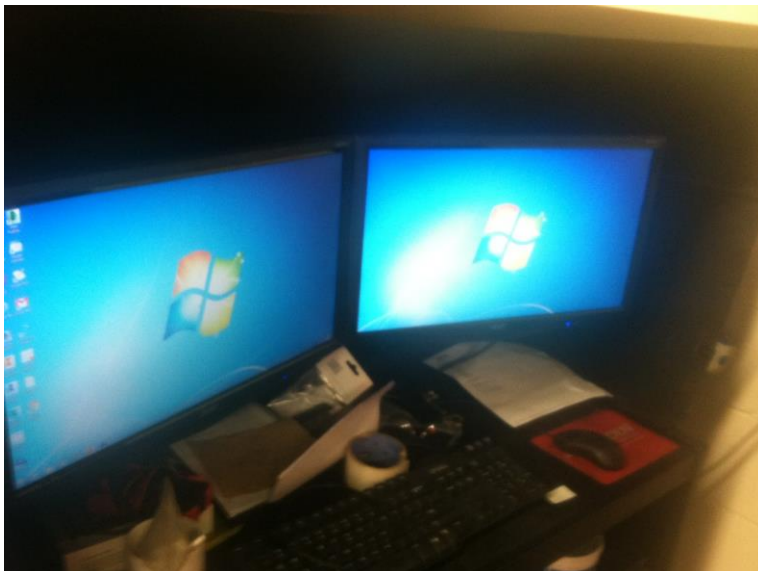

This week has been a busy week of getting everything organized and getting the brand new CNC Plasmacam. Also we set a ground rod to make sure our Plasmacam can function properly. We have to make a few minor adjustments to the Plasmacam so it makes more accurate cuts.

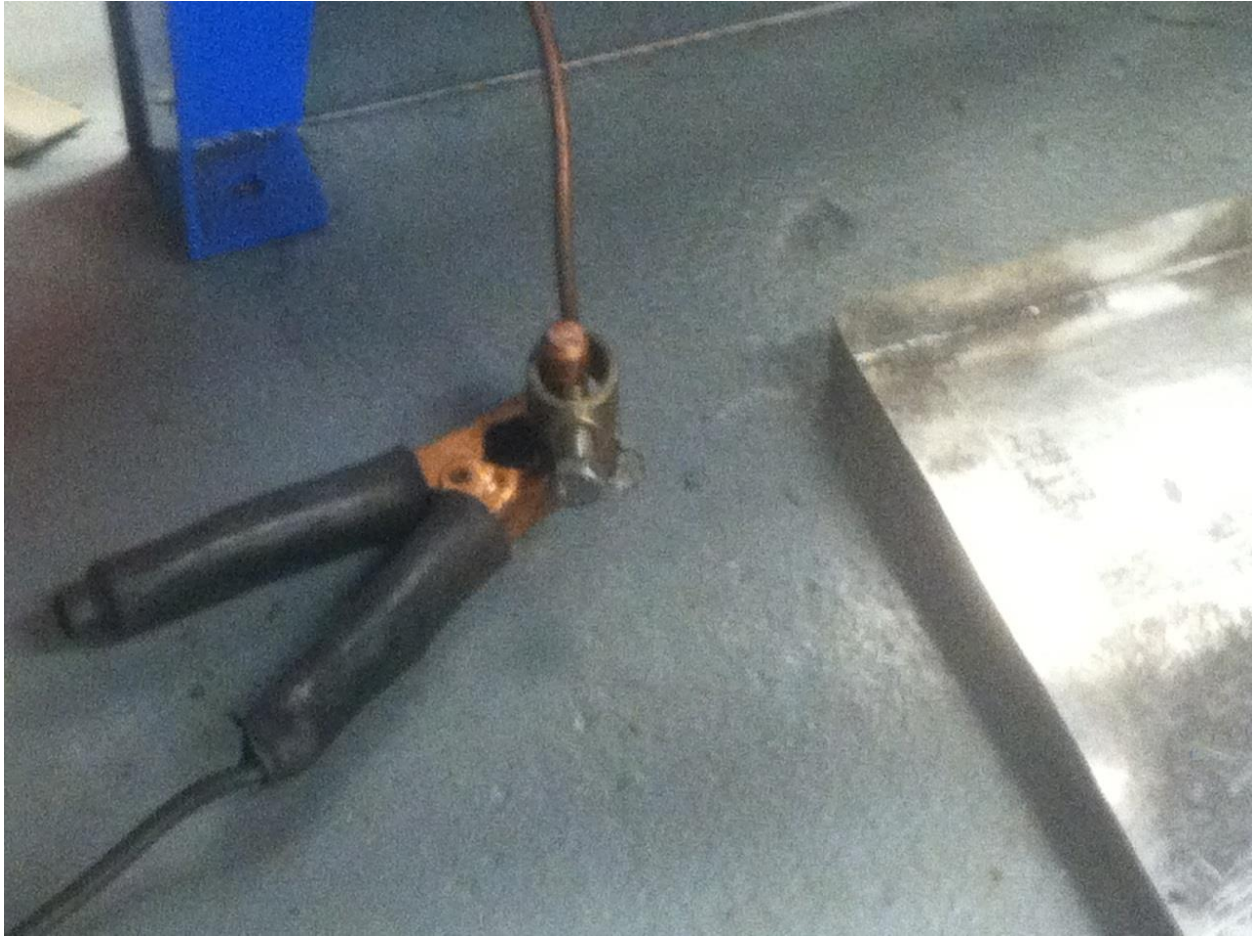

This is some of our Cub Manufacturers cleaning our new CNC Plasma cutter.

Our new Plasmacam. Mr. Lamb was happier than a kid at Christmas.

Our system for the Plasmacam but we are still testing everything out. But we are still in our testing phase.

Our grounded rod for our Plasmacam. It was awesome watching as we all work to put it in the ground.
